

Field course: Marine environment of the Bothnian Bay

Online preparatory lectures: 25 and 27 May 2021

Field course, Bothnian Bay: 16 - 20 August 2021

Unique opportunity for students

During the course the students will learn about the marine nature of the Bothnian Bay, its species and methods used for underwater inventories. The course is only offered once and it is a unique opportunity for the students to gain knowledge and learn new skills which are needed if one wants to work with marine nature. The course will be held at the research station on the island Ulkokrunni, situated off the coast of the municipality of Ii, Finland. We travel by boat from Ii and on some days we work in a small boat.

About the course

- Course language: English.
- 12 places available, preferably an even mix of students from universities in Finland and Sweden.
- Food and accommodation are included in the course.

The course is arranged by the Interreg Nord project SeaCOMBO and the University of Oulu. SeaCOMBO is a collaboration between the County Administrative Board of Norrbotten, Sweden and the ELY-centre of northern Ostrobothnia, Finland and financed by Interreg Nord and Lapin Litto.

Cooperation in the Bothnian Bay

Requirements

- Basic skills in identification of flora and fauna.
- Ability to communicate English (read and speak).
- Ability to work in the field (from boat and sea shore) in potentially bad weather conditions.
- Ability to work and cooperate in small groups.
- Students who are doing their bachelor's degree or higher in areas of biology, geography, geology, environmental science or similar can sign up.

Application

Write a short letter, approximately 1/2-1 page.

The participants will be chosen based on their earlier studies, skills and motivation.

Apply via this link:

<https://webropol.com/s/seacom-bo-fieldcourse2021>

Application is open until 30 April 2021.
